

# SonicAire Mounting Options

## VAS

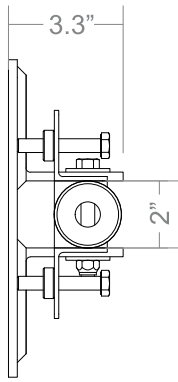

### Vertical Adjustable Support

The VMS is designed for facilities with tapered vertical support structures, such as a structural concrete tee or beam roof support. The support mounts on the side of the beam or structure.

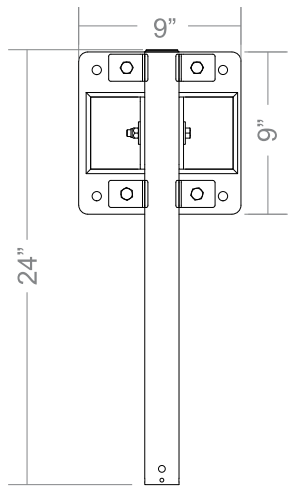

**Note:** SonicAire does not provide attachment hardware for the VAS. The necessary hardware is determined by the structure to which the VAS is secured.

**Approx. Weight: 18 lbs**  
(in addition to fan assembly)
